& DATASHEET**

Liquid Fertiliser

SICO COMBIPHOS-L

N+P 10-30 (w/w) liquid starter fertiliser characterized by gradual release.

28/06/2017

1. PRODUCT DESCRIPTION

SICO COMBIPHOS-L is the perfect starter fertiliser because it contains phosphorus **in the form of polyphosphates** with different levels of polymerisation.

When applied onto the soil, **SICO COMBIPHOS-L** slowly releases phosphorus that is easily assimilated by roots. This process usually lasts 40-60 days on average from the time of application. In this way, adequate amounts of available phosphorus are released day by day to the crops. **SICO COMBIPHOS-L** is, therefore, necessary in soils that have a high active calcareous content. **SICO COMBIPHOS-L** may be applied in pre-seeding, or at pre-emergence.

2. PRODUCT SPECIFICATIONS

<u>Composition</u> :	<u>% w/w</u>	<u>% w/v</u>
Ammoniacal nitrogen (N)	10	13.8
Phosphoric anhydride (P2O5), water soluble	34	47

<u>Specification</u> :	
Density	1380 g/l
pH	7.5 – 8.5

State : liquid

Application : soil & drip irrigation

3. RECOMMENDATIONS FOR USE

Doses are referred to each application

CROPS	APPLICATION RATE	NUMBER AND TIMING OF APPLICATIONS
Fruit trees	40 – 80 kg/ha 30 – 60 l/ha	1-2 applications from vegetative renewal until flowering.
Vegetables Ornamentals, nursery		After transplanting or in the first stages of vegetative cycle, until flowering.
Cereals and industrial crops		Before seeding, at seeding, and in pre-emergence applications.

4. WARNING

The efficiency of **SICO COMBIPHOS-L** is enhanced when used in a mixture with organic products (eg AMINOTONIC-L, PEPTAMIN-L)

The product is stable from + 5° C. to + 35° C. Store in a well-ventilated, cool, dry place, away from sources of heat/ignition. Protect from sunlight.

5. PACKING

20 l tank, 210 l drum, 1000 l IBC tank
