

**PRODUCT INFO
& DATASHEET**

SICOSAL[®] PLUS DRY

Salmonella inhibitor - Code No AM12b

PRODUCT DESCRIPTION

SICOSAL[®] PLUS DRY is a synergistic combination of strong anti-bacterial & anti-microbial ingredients with pH lowering effect to control several micro-organisms including Salmonella bacteria.

SICOSAL[®] PLUS DRY eliminates Salmonella in feed and feed ingredients and prevents recontamination by Salmonella after heat treatment.

SICOSAL[®] PLUS DRY provides an alternative approach to heat treated feed to eliminate Salmonella from feed and raw materials.

- ➔ Compared to many competitors in the market, SICOSAL[®] PLUS DRY is a highly concentrated product. We use a high quality carrier that absorbs 65 - 70 % of liquid whereas many competitors use a vermiculite that only absorbs about 45 % of liquid. Our product is also very free flowing because of the carrier quality.

INGREDIENTS

A broad spectrum anti-bacterial activity based upon: formic acid, salts of formic acid, propionic and sorbic acids.

SPECIFICATIONS

- * Appearance : Free flowing powder
- * Colour : White
- * Compatibility : All ingredients

ADVANTAGES

- * Prevents and eradicates Salmonella growth both in contaminated feed and gastro-intestinal tract
- * Prevents the development and growth of Salmonella in uncontaminated feed
- * Improves palatability and nutrient digestibility
- * Improves animal performance
- * Reduces mortality & diarrhoea and wet litter occurrence
- * Improves shelf-life
- * Non dusty

APPLICATION & DOSAGE

- * In non heat treated feed and feed raw materials : 3 kg per ton/feed
- * In heat treated feeds : 2 kg per ton/feed

For severe contaminations higher dosage rates can be recommendable.

STORAGE

Store dry, dark and cool.

STABILITY

min. 24 months after production date.

STANDARD PACKING

25 kg bags / 1000 kg FIBC.
