SICOCOTE® Triple 14, 14-14-14 (SOP) **(4M, 6M, 8M, 12M)***

10/2023

1/ DESCRIPTION

100% coated controlled release fertiliser with all essential main nutrients for optimal plant growth in each granule. It features a very balanced nitrogen-phosphate-potassium ratio and is therefore usable for a wide range of horticultural crops. As Sulfate of Potash (SOP) is the only source of Potassium, the SICOCOTE® Triple 14, 14-14-14 (SOP) is free of chloride. This makes the formulation very suited for application to young plants and propagation, where the high phosphorus level is improving the root development. The nutrients are released as needed over the specified longevity depending only on the soil temperature (defined for 20-21°C). The typical, delayed initial release after 2-3 weeks ensures a high safety to crops.

2/ APPLICATION

Propagation and young plant production, Fertilization of pot plants, balcony boxes, hanging baskets and tubs, container nursery stock.

3/ CERTIFICATE OF ANALYSIS

Sicocote Triple 14, 14-14-14 (SOP) *		
14 %	N	Total nitrogen
6.2 %	N-NO ₃	Nitric nitrogen
7.8 %	N-NH ₄	Ammoniacal nitrogen
14 %	P₂O₅	Phosphate soluble in neutral ammonium citrate and water
12 %		Phosphate soluble in water
14 %	K₂O	Potassium soluble in water
4 %	S	Sulphur soluble in water
