SICOFLO[®]

German Growing Substrates & Potting Soils

Your Professional Programme for Visible Planting Success!

Product survey - Origin: Germany

SICOFLO[®] products are **produced in most up-to-date factories** with the latest scientific know-how and technology to meet the high quality standards demanded today in our export markets.

Computer-controlled metering systems operate with extreme accuracy, whilst intensive mixing processes ensure a homogeneous uniform quality. This is also guaranteed by continuous quality controls during the production process itself and by examination of samples for the most important components, such as pH and salt content.

Only products meeting our strict quality standards are allowed to leave our factories!

SICO's professional programme for horticulture, house and garden comprises:

- **SICOFLO[®] GROWING SUBSTRATES:** a complete range for successful horticulture! (in 80 ltr bags)
 - Type 1: Seedling & young plants substrate
