& DATASHEET

SICO Chelated micronutrients for use in animal nutrition - E.U. origin -

11/2023

INTRODUCTION & GENERAL INFO

1. We have in our portfolio 2 main families of single chelates applied in animal nutrition: **SICO-GLYCHEL** (chelates of glycine) and **SICOCHEL-BIO** (chelates of hydrolysed soy protein).
2. Additionally we have a range of **SICAMINO** products that are blends of chelated minerals (based on the glycine ones).
3. For single compounds there is no MOQ in fact, which for blends MOQ is 500 kg per product.
4. In attachments please find specifications of our main products
 - 6 **SICO-GLYCHEL chelates** (Zn, Mn, Cu, Fe, Ca, Mg)
 - 4 **SICOCHEL-BIO chelates** (Zn, Mn, Cu, Fe)
 - 7 **SICAMINO Feed Premixes** (standard ones).

Please also note, that apart of offered products we have in our portfolio organic forms of Selenium, Cobalt & Iodine and can also propose tailored blends (in case Customer prefers compositions different from our regular SICAMINO ones).

We kindly ask you to familiarise yourselves with the information attached.
We hope to receive your detailed inquiry.
