& DATASHEET

## **SICO-FARMCARE MYCO**

*Mytotoxin problem solver & detoxification & improves production.*

01/2021

### **1. INTRODUCTION**

Mycotoxins are known to be common feed contaminants for poultry and pigs, causing loss of body weight, productivity and the cause of feed misuse. A humid, warm climate, improper storage conditions favor the growth of fungi.

SICO-FARMCARE MYCO destroys mycotoxins in 4 ways:

1. acts as a mold inhibitor
2. inhibits the biosynthesis of mycotoxins
3. effectively binds toxins in the digestive tract
4. supports the bione neutralization of mycotoxins in the liver

#### **\* Categories**

- poultry
- ruminants
- swine

Tags : Mycotoxins

Product ID : 5952

### **2. DESCRIPTION**

A herbal and mineral preparation that binds and neutralizes toxins, helping to fight the dangers of mycotoxins.

Actions of SICO-FARMCARE MYCO:

- binding and inactivation of mycotoxins
- inhibiting a broad spectrum of molds
- inhibiting the production of mycotoxins in feed
- biodegradation of mycotoxins

Category: Poultry, Mycotoxins

Solution for: Mycotoxins, Detoxification, Improving Productivity

### **3. ADDITIONAL INFORMATION**

#### **\* Benefits**

- Binding and deactivating mycotoxins
- Hindering wide range of moulds
- Boosts immunity, facilitates liver functions

#### **\* Administration**

Depending on the level of mycotoxins from 0.5 kg to 1.25 / 1 ton of feedstuff

- with up to 200 ppb and period of reduced risk – 0.5 kg/ton
- with more than 200 ppb and period of considerable risk 1-1.25 kg/ton
- recommended dose for sows – 0.5kg/ton

### **4. PACKING**

20 kg multilayer paper bag x 50 = 1000 kg per industrial pallet (size 1200 x 1000 mm).
