

PRODUCT INFO
& DATASHEET

SICO-AEROCID®

A Complex remedy based upon organic acids in combination with herbs that possess an antibacterial action.

1. COMPOSITION

Organic acids and essential oils.

SICO-AEROCID is a complex remedy based upon organic acids in combination with herbs that possess an antibacterial action. Can be used on poultry – more specifically in group accommodations.

2. BENEFITS

- **Stress-reducing**
- **Increases resistance of the airways**
- **Takes care of an improved stable climate**
- **Promotes mucous discharge**
- **Supports the natural immunity of animals**
- **Antibacterial action**

3. RECOMMENDED USAGE & APPLICATION RATES

Dilute SICO-AEROCID at a ratio of 1 + 3 litres hot water (approximately 70°C). This mixture is preventatively nebulized 2 x per week with a dosage of 5 ml per m³ stable volume calculated to 1 m above the animals. With coughing (or snuffling, sneezing) animals, nebulize with a dosage of 10 ml/m³ stable volume also calculated to 1 m above the animal for 2 weeks.

Warning : intention is not to atomise to such a degree that the animals become wet, which could lead to sudden cooling. In such a situation, an overdose could be hazardous.
