Specialty Feed Additives – Prime Series

SICOBUT PRIME DRY

*Target release source of butyric acid.
(code nr. 1003804)*

revised 01/2020

1. SCOPE

The increasing animal genetic potential puts a significant stress on the animals' digestive system, often leading to a suboptimal digestive process and nutrient absorption. The negative impact of sub-optimal feed utilization has a significant impact on the economical viability of the farm. Mono-butyryl is an important dietary component that can help balance and stimulate a healthy intestinal microflora.

2. DESCRIPTION

Complementary feed. A synergetic combination of Esterified Butyrins, with immediate activity in the early part of the intestinal tract, and a prolonged effect towards the hindgut.

3. COMPONENTS

Esterified butyrins, carrier and anticaking.
