Specialty Feed Additives – Prime Series

SICOMOLD PRIME DRY +

Dry mould inhibitor based on combined activity of propionic acid, acetic acid and salts (LOC). (code nr. 1003586)

9/2014

1. SCOPE

Animal feed should be in excellent condition to ensure its maximum nutritional efficiency in intensively grown poultry and livestock. Moulds produce toxins which cause many disorders and deficiencies in animals. Feedstuffs should be kept free of mould and toxins during their storage and long enough until they are consumed. Preservatives are added to feed in order to control mould development and other undesired contaminations like yeasts and bacteria.

The product is applicable in feed and pet food.

2. DESCRIPTION

Dry mould inhibitor based on combined activity of propionic acid, acetic acid and salts.
