Nutritional Oral Liquids

# SICO METHIONINE 80 Oral

## Solution for oral administration

### **1. Composition:**

Contains per ml:

Methionine 880 mg

Solvents ad. 1 ml

### **2. Description**

SICO METHIONINE 80 Oral ensures the adequate supply of Sulphur amino acids, especially of the essential amino acid methionine. Methionine is involved in protein synthesis and also serves as a co-factor in a variety of biochemical reactions, through its function as methyl donor. Methionine is the first-limiting amino acid in typical poultry diets and also diets for growing pigs, calves, dairy cows, goats and sheep can show a considerable deficiency in methionine. SICO METHIONINE 80 Oral can compensate such deficiencies.

### **3. Indications**

Prevention and treatment of methionine deficiencies in cattle, pigs, poultry, goats and sheep.

Contra indications \_\_\_\_\_ : none

Side effects \_\_\_\_\_ : no side effects are to be expected under the prescribed dosage regimen

Withdrawal times \_\_\_\_\_ : none
