Nutritional Oral Liquids

SICOMIN Zn-Chel Oral

Solution for oral administration

1. Composition:

Contains per ml:

Zinc : 100 mg

2. Description

SICOMIN Zn-Chel Oral is a nutritional liquid for oral administration containing chelated zinc. Chelated zinc is easy to absorb and can be simply administered through drinking water. SICOMIN Zn-Chel Oral is mainly used to correct zinc deficiency. Zinc has beneficial effects on animal health and has an essential role in enzyme systems. Furthermore, zinc boosts the immune system, stimulates optimal skin health and contributes to an optimal function of the reproductive system.

3. Benefits

- complements zinc deficiency
- chelated zinc can easily be absorbed
- boosts the immune system
- stimulates optimal skin health
- contributes to an optimal function of the reproductive system
- zinc is essential for the function of many enzyme systems
- simple administration through drinking water

4. Indications

SICOMIN Zn-Chel Oral is indicated as a supplementary compound feed for poultry and pigs.

Contra indications _____: over long term usage can interfere with the absorption and utilization of other nutrients.

Withdrawal times _____: none

5. Dosage

For oral administration via drinking water.

- Pigs and poultry: 100 ml SICOMIN Zn-Chel Oral per 400 – 2000 litres of drinking water (5 – 25 ppm).

6. Warning

The dosage and frequency of therapy required depends on the clinical condition and zinc status of the animal as assessed by blood and liver levels both before and after therapy. If there is any doubt about the zinc status, random blood and/or liver samples should be taken prior to treatment. Do not mix SICOMIN Zn-Chel Oral with other medicines.

7. Packaging

Bottle of 1000 ml and jerrycan of 5 litres.
