Nutritional Oral Liquids

# SICOSAN Oral

## Solution for oral administration

### **1. Composition:**

Oregano oil (*Origanum vulgare*) .  
Thyme oil (*Thymus vulgaris*)  
Garlic oil (*Allium sativum*)  
Extract of *Echinacea purpurea*  
Sage oil (*Salvia officinalis*)  
Rosemary oil (*Rosmarinus officinalis*)

### **2. Description**

SICOSAN Oral is a unique carefully selected composition of natural plant extracts for the prevention of coccidiosis for all species and groups of poultry. Furthermore, SICOSAN Oral also has bacteriostatic and immunostimulant properties. This product helps in the solution to the problem of growing resistance of protozoa to coccidiostats. The plant extracts in SICOSAN Oral are rich in 'phytoncides', this inhibits the growth and development of bacteria, fungi and coccidia. SICOSAN Oral provides an effective protection against broiler diseases under a moderate exposure to coccidia, as well as alleviates the course of the disease at strong invasion of protozoa. The positive influence of phytogetic ingredients on the quality of meat and eggs is an additional advantage.

### **3. Benefits**

- Contributes to the prevention of coccidiosis
- Supports better breeding efficiency
- Contributes to improved resistance to bacterial, fungal and viral infections
- Excellent source of antioxidants
- Contributes to increased enzymatic activity of the intestinal mucosa
- Contributes to improved feed intake and enhanced weight gain
- Supports the secretion of bile
- Contributes to improved meat and egg quality

### **4. Dosage**

For oral administration in poultry.  
via water : 1 ltr per 1000 ltr of drinking water  
via feed : 1 ltr per 500 kg of complete feed

### **5. Packaging**

Bottle of 1000 ml and jerrycan of 5 ltr.
