**SICORGAN**  
**CHFM CP 75**

**SICORGAN**  
**CHFM CP 80**

#### **3. BENEFITS**

Products are produced by hydrolysing at high temperature clean, undecomposed feathers of slaughtered poultry free from chemical or physical contamination.

They are an excellent source of protein esp. for petfeeds and other animal feeds (the protein in feathermeal is degraded slowly in the rumen compared with other protein sources) and of organic nitrogen & amino acids in organic fertilisers.

Users are requested to abide by any local regulations for the use of these products in their country and to inform us accordingly as we work only strictly in accordance with any existing local legal framework.

#### **4. PACKING**

In 50 kg net wpp + pe bags, 20 MT/20' fcl.
