SICO MC (Micro Crumb) & RC (Regular Crumb) TECHNOLOGY
in our ***SICO-ECOGREEN***
SICO-ECOPROF
SICO-PROTURF
ranges of organic and organo-mineral fertilisers

09/2024

Micro Crumb (MC):

A very small crumb (0.7 mm – 2.0 mm) with an optimized particle density. SICO Micro Crumb guarantees an even spreading and a rapid dissolving after application. This crumb is dustproof and has no unpleasant smell, is easy to spread and ensures a superior result. Each crumb contains a full NPK-menu for the plant and is available in numerous organic and organo-mineral formulations.

ADVANTAGES OF MICRO CRUMB:

- Due to dustproof granules a cleaner application is possible
- Crumbs fall deep into the lawn, quicker and better result
- Available in both organic or organo-mineral NPK menu
- Each crumb contains all necessary nutrients for a good development
- More equal distribution while spreading

Regular Crumb (RC):

This crumb size (2.0 mm – 2.8 mm) is less expensive than the Micro Crumb but still of exceptional high quality. Offered in a wide range of organic or organo-mineral formulations. Still over more than 85% of the European market choose this type of crumb as preferred product form.

PRODUCTS IN BIG BAGS

ECOPROF range products are also available in big bags with a capacity of 500 kg or 1000 kg. These big bags are ready to transport (4 loops) and equipped with an inliner (plastic bag). In addition, they are completely waterproof and can be stored outside (not recommended!) or under a shelter. At the bottom of the big bags there is a lockable opening (channel) which allows you to dose the fertiliser easily.

Order quantity: available starting from 6000 kg per formula.

Dimensions (in cm):

	L	B	H
500 kg (2 BB per pallet)	87	87	155
1000 kg (1 BB per pallet)	90	100	197
